

Lighting Project Questions 9/10/24 Email

- Where the existing pole mounted fixtures are being removed and replaced in kind, is it safe to assume that re-use of the existing conduit and wiring is acceptable, assuming it is in usable condition? **College expects new conduits & wiring throughout (see scope).**
- What is the expectation for the disposal of the existing pole mounted fixtures? Does the college want to keep them or is the contractor responsible for removing them from the site and properly disposing of them? **Contractor to remove & dispose.**
- The only specs provided for the new pole mount lights and lighted bollards are: "Light pole height: Approximately 20 feet; Bollard light height: Approximately 5 feet." Short of furnishing a manufacturer and catalog number for these, does the college have a style in mind? Something similar to the existing ones or perhaps more *modern*, so to speak? **See additional specs posting for bollards.**
- Are there extant, as-built drawings that show a scaled site plan and information like the location of the "main building's East entryway electrical room" from which to feed new lights? **No current electrical drawings, During site visit electrical room locations will be shown.**
- We are looking for more info on the bid advertised, prints and specs. **Currently No Prints and lighting example is posted on website.**
- Phone message **Questions are to be made by email. Answers posted to the Web.**
